

BLACKSMITH EXPERIENCE DAY

A blacksmith is shown in a workshop, focused on his craft. He is wearing a dark t-shirt and is captured in the middle of hammering a piece of bright orange-red metal on an anvil. The scene is dimly lit, with the primary light source being the intense heat of the metal, which casts a warm glow on the blacksmith's face and the surrounding area. In the background, various items are visible on the wall, including a clock and several framed certificates or awards. To the right, a red gas cylinder is partially visible, along with some equipment and a yellow bag.

For the perfect experience day or gift, come and spend a day working by the fire in our well established forge in **Horsmonden**.

Work for the day under the instruction of experienced blacksmith, **Michael Hart**, as you learn to forge steel and create items to take home with you.
